Gas Range with Precision Cooking™ System

Top Features

Precision Cooking™ System

This cooking system preheats the oven to exactly the right temperature and maintains consistently even temperatures for better baking and broiling results. Select models also use power vents to evenly distribute oven air for uniform browning.

Power Center Cooktop (Four Burners/One Flex-Choice™ Simmer Burner)

Various combinations of elements (electric) and burners (gas) deliver high-performance options for more cooking versatility than ever before.

Self-Cleaning Oven with Adjustable Levels

Automatically cleans the oven according to a preprogrammed cycle that allows you to match the cleaning level to the amount of food buildup in the oven—light, medium or heavy.
